

1 **Instructions:**

2 This questionnaire aims to gather your level of agreement regarding the Functionality,
3 Usability, and Reliability of the “**Present and Ready: A Liveness Detection for Real-**
4 **Time Face Recognition Attendance System.**”

5 After using or testing the system, please evaluate each statement by selecting the
6 response that best reflects your experience.

7 *Likert Scale:*

8 **1 – Strongly Disagree | 2 – Disagree | 3 – Neutral | 4 – Agree | 5 – Strongly Agree**

9 **FUNCTIONALITY**

Item No.	Statement	1	2	3	4	5
1	The system accurately detects faces in real time.					
2	The system correctly recognizes registered students.					
3	Liveness detection works effectively in preventing spoof attempts.					
4	Attendance is logged automatically and reflects accurate timestamps.					
5	The system performs the intended attendance functions without failure.					
Functionality Scale Total:						

11 **USABILITY**

Item No.	Statement	1	2	3	4	5
6	The system is easy to learn and operate.					
7	The user interface is structured, clear, and easy to navigate.					
8	Starting and ending class sessions through the system is simple.					
9	System features and controls are intuitive and understandable.					
10	The system helps reduce workload and improves class management efficiency.					
Usability Scale Total:						

12

13 **RELIABILITY**

Item No.	Statement	1	2	3	4	5
11	The system consistently records attendance without interruptions.					
12	Facial recognition remains stable even with natural student movements.					
13	The system operates reliably during full class sessions (10–15 students).					
14	The system performs adequately under varied classroom conditions.					
15	Attendance data is stored correctly and remains accessible at all times.					
Reliability Scale Total:						

14
